\end{aligned}$$

Exact Boundary Constants & Invariant Relations

1. **Vacuum Geometry** : $\mathcal{M}_{\text{vac}} = V_2(\mathbb{R}^3) \cong SO(3), \quad \text{Out}(\text{Spin}(8)) \cong S_3 \implies \mathbb{Z}_3$ (Exact 3 Matter Generations)
2. **Cosmic Horizon Scale** : $a_0 = \frac{cH_0}{2\pi} \approx 1.20 \times 10^{-10} \text{ m/s}^2, \quad \Sigma_c = \frac{a_0}{2\pi G} \approx 857 M_\odot/\text{pc}^2$
3. **Chiral Coupling Invariant** : $\chi_Y = \frac{1}{\sqrt{2}}, \quad \kappa_Y = \sqrt{\theta(2-\theta)} = 0.953939\dots \quad (\text{for } \theta = 0.7)$
4. **Bare UV Planck Gauge Matching** : $g_{\text{bare}}(M_{\text{Pl}}) = \frac{\kappa_Y \chi_Y}{\pi} = \frac{0.9539 \times 0.7071}{\pi} \approx 0.2147$
5. **Disformal Metric Wave Speed** : $\tilde{g}_{\mu\nu} = g_{\mu\nu} + 2\ell_P^2 \nabla_\mu \chi \nabla_\nu \chi \implies \left| \frac{v_{\text{gw}}}{c} - 1 \right| = 0$ (Exact Concordance with GW170817)
